

## Homeowner Septic System Workshops November 10 in Seguin

Texas A&M AgriLife Extension Service, Guadalupe-Blanco River Authority and Texas State Soil and Water Conservation Board will present a general 2-hour “Homeowner Maintenance of Septic Systems Course” from 6-8 p.m. Tuesday, November 10<sup>th</sup>.

The class is free and will be held at the Guadalupe County AgriLife Extension office at 210 E. Live Oak Street in Seguin.

“The 2-hour program will provide a basic understanding of the operational and maintenance activities of conventional and aerobic septic systems,” said Ward Ling, AgriLife Extension program specialist, College Station.

Ling said topics covered will include treatment processes, health and safety considerations, how to inspect and maintain the system, and instruction on how activities in the home can impact the system.

“The course provides answers to some of the most frequently asked questions, including when to pump out a tank, and what should not go down the drain,” he said.

Seating is limited, so registration is required to reserve a seat. To register for either class, contact Ling at 979-845-6980 or [wling@tamu.edu](mailto:wling@tamu.edu). For more information, go to <http://www.geronimocreek.org/>

Funding for these classes is provided through a Federal Nonpoint Source grant provided to Texas A&M AgriLife Extension by the Texas State Soil and Water Conservation Board.
